SUMMARY

Full Stack Developer with **1.5+ years of experience** for French companies (XPENG France via AMILKAR, Kysmet France) and Computer Engineering student specializing in Data Science at TEK-UP University. Seeking a **6-month Data Science internship** (ideally leading to full-time) in data preprocessing, model training and evaluation. **Available from mid-December 2026**, open to relocation.

EDUCATION

TEK-UP University 2024 – Present
Engineering Degree in Computer Engineering, Data Science specialization

Higher Institute of Information and Communication Technologies 2024
Bachelor of Science in Computer Science: Software Engineering and Information Systems *High Honors*

EXPERIENCE

AMILKAR January 2026 – Present
Full Stack Developer (client: XPENG France)

- Design and build end to end an internal platform for test drives, staff, sales targets, deliveries, calendar and email.
- Built CRM and after-sales service (SAV) modules that centralize customer follow-up for sales and service teams.
- **Tools:** React, Node.js, Python, Git

Kysmet France March 2025 – September 2025
Full Stack Developer

- Built, hosted and monitored client websites (onairtvradio.com, aekygo.fr); integrated third-party AI APIs.
- **Tools:** Next.js, React, Node.js, Supabase, Python, ParseHub, Azure DevOps, Git

Caustaza LTD Group January 2024 – May 2024
AI Developer – Final Year Project

- Built an AI chat calendar that interprets attendee email replies with an NLP model and auto-schedules meetings.
- Designed a data pipeline collecting email data into MySQL to build a dataset for model retraining.
- **Tools:** Python, PyTorch, NLP, LLMs, Django, Angular, MySQL, Git

PROJECTS

Licence Plate Recognition & Speed Estimation | *Python*, *YOLO11*, *PyTorch*, *OpenCV*, *EasyOCR* 2026

- Detects, reads and tracks plates in images, video and live streams (Latin script, 60+ countries, and Arabic), with tiled inference for distant plates and multi-frame voting.
- Speed estimation via road-marking homography; rebuild of my 2022 InceptionResNetV2/YOLOv5 version.

Learnova | *Python*, *RAG*, *LLMs (Ollama)*, *FastAPI*, *Next.js*, *PostgreSQL/pgvector* 2025

- RAG pipeline: course PDFs are OCR'd, chunked, embedded (multilingual-E5) into pgvector and reranked (bge-reranker) to ground LLM-generated flashcards, exams and a knowledge graph.

AI Gym Coach | *Python*, *YOLO*, *PyTorch*, *OpenCV*, *Apache Spark*, *Kafka*, *Wear OS*, *iOS* 2026 – Present

- YOLO exercise recognition from video; Galaxy Watch 7 and iOS data feed a big data injury-risk pipeline.

TuniTech Advisor | *Python*, *pandas*, *scikit-learn*, *BeautifulSoup*, *FastAPI*, *React*, *Docker* 2025 – 2026

- Scraped and cleaned 1,236 phone listings from 5 Tunisian retailers for price prediction and recommendations.
- Fixed target leakage behind an R^2 of 0.9998; gradient boosting predicts within 14% on unseen phones (R^2 0.87).

SKILLS

Data Science & Machine Learning: pandas, NumPy, scikit-learn, PyTorch, NLP, LLMs, RAG, PCA, Clustering
Computer Vision: YOLO, OpenCV, OCR (EasyOCR), Object Tracking, TensorFlow
Big Data & Visualization: Apache Spark, Kafka, Power BI, Matplotlib
Programming Languages: Python, SQL, R, JavaScript, TypeScript, Java
Web Development: React, Next.js, Node.js, Express.js, Angular, Django, FastAPI, Spring Boot
Data Collection: BeautifulSoup, Scrapy, Selenium, ParseHub, REST APIs
Databases & DevOps: PostgreSQL, MySQL, MongoDB, Supabase, Docker, Git, Azure DevOps, AWS
Languages: Arabic (Native), English (Fluent), French (Professional working proficiency)
